

MISSION

Mission Darts are the result of a genuine passion for the game of darts, and decades of experience culminating in an unsurpassed level of expertise and knowledge of the sport. Our team of experts and designers use the very latest techniques in engineering and design to bring you darts of the highest quality, made without compromise.

95% TUNGSTEN RANGE

KRONOS

The Mission Kronos consists of a straight barrel and radius nose. Across the length of the barrel radial grooving is contrasted by the striking ocean blue titanium nitride PVD coating located within the parallel milled cuts and Iso-Grip. The dart is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 1
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KRONOS

The Mission Kronos features a bull nose transitioning into a parallel front section which then narrows through a fine radius into the rear. Radial grooving is accentuated by the stunning ocean blue titanium nitride PVD coating along the parallel milled cuts and Iso-Grip. The Mission logo is subtly laser etched into the very rear of the barrel.

Model 2
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

STEEL TIP DARTS

95% TUNGSTEN RANGE

KRONOS

The Mission Kronos consists of a slender torpedo design and radius nose with a variety of radial grooves featuring throughout. The tapered rear portion of the dart incorporates Mission's new Iso-Grip technology and laser etched Mission logo. The parallel milled cuts at the front, and alternating isogons in the rear section are highlighted by a visually stunning ocean blue titanium nitride PVD coating.

Model 3
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

STEEL TIP DARTS

95% TUNGSTEN RANGE

KURO

The Mission Kuro features a straight barrel design with a bull nose. Radial grooves feature throughout the length of the dart. Re-machined grooves and milled cuts then provide a striking contrast against the black titanium nitride PVD coating, further enhanced by the laser etched Mission logo.

Model 1
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KURO

The Mission Kuro benefits from a fully contoured black titanium nitride PVD coated barrel with a radius nose. Microgrips and radial grooves are complimented by re-machined fine shark cuts and intricate parallel milled cuts. The Kuro is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 2
Available Weights: 21g, 23g
Match Weighted to $\pm 0.05g$

STEEL TIP DARTS

95% TUNGSTEN RANGE

KURO

The Mission Kuro is a black titanium nitride PVD coated dart that tapers from the centre of the barrel to both the front and rear.

The radius nose transitions into radial grooves and then, in the rear portion of the barrel, Mission's Iso-Grip. The laser etched Mission logo, accompanied by re-machined radial grooves and milled cuts, ensure a striking visual impact from the Kuro.

Model 3
Available Weights: 22g, 24g
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KURO

The Mission Kuro incorporates a torpedo barrel design that features a long radius nose and tapers to the rear. The black titanium nitride PVD coated dart includes radial and fine shark cuts throughout with contrasting re-machined milled parallel cuts across the length of the barrel, alongside the laser etched Mission logo.

Model 4
Available Weights: 21g, 23g
Match Weighted to $\pm 0.05g$

STEEL TIP DARTS

90% TUNGSTEN RANGE

REIKI

The Mission Reiki consists of a radius nose leading into a slender taper which progresses from the nose to the rear of the barrel. Across the length of the barrel a variety of radial grooves are accentuated by the stunning red electroplate finish, the signature of the Reiki dart. In contrast to the vibrant red, parallel re-machined milled cuts feature throughout. The dart is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 1
Available in two weights: 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

REIKI

The Mission Reiki incorporates a torpedo design which features, across the whole length of the barrel, a variety of radial grooves. These precision grooves are accentuated by the stunning red electroplate finish, the signature of the Reiki dart. In contrast to the vibrant red, parallel re-machined milled cuts feature throughout. The dart is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 2
Available in two weights: 22g, 24g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

REIKI

The Mission Reiki consists of a straight barrel with a bull nose. Across the length of the barrel a variety of radial grooves are accentuated by the stunning red electroplate finish, the signature of the Reiki dart. In contrast to the vibrant red, parallel re-machined milled cuts feature throughout. The dart is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 3
Available in three weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

QUADRANT

The Mission Quadrant features a straight barrel design with a bull nose. Radial grooves and precision parallel milled cuts combine in the central region of the barrel to generate Mission's new Quadrant Grip. A durable black titanium nitride coating is located within the cuts, in sharp contrast to the tungsten barrel. This stunning dart is completed by the Mission logo, laser etched into the rear of the barrel.

Model 1
Available in two weights: 22g, 24g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

QUADRANT

The Mission Quadrant features a torpedo design with a radius nose. Regions in both the front and rear of the barrel incorporate Mission's new Quadrant Grip. Radial grooves and precision parallel milled cuts combine to generate Mission's latest grip. A durable black titanium nitride coating is located within the cuts, in sharp contrast to the tungsten barrel. This stunning dart is completed by the Mission logo, laser etched into the rear of the barrel.

Model 2
Available in two weights: 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

QUADRANT

The Mission Quadrant features fully contoured, front loaded design leading into a straight rear section of the barrel. Radial grooves and precision parallel milled cuts combine along the central region of the barrel to generate Mission's new Quadrant Grip. A durable black titanium nitride coating is located within the cuts, in sharp contrast to the tungsten barrel. This stunning dart is completed by the Mission logo, laser etched into the rear of the barrel.

Model 3
Available in three weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

QUADRANT

The Mission Quadrant features a straight barrel design with a bull nose. Regions in both the front and rear of the barrel incorporate Mission's new Quadrant Grip. Radial grooves and precision parallel milled cuts combine to generate Mission's latest grip. A durable black titanium nitride coating is located within the cuts, in sharp contrast to the tungsten barrel. This stunning dart is completed by the Mission logo, laser etched into the rear of the barrel.

Model 4
Available in three weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NIGHTFALL

The Mission Nightfall features a straight barrel design with a bull nose. The ringed front and central region then progresses into a very finely tapered rear, which incorporates an ultra fine ringed grip. During its production the barrel undergoes both black and blue electroplating, providing a sharp contrast to the tungsten that's exposed by our precision re-machining process. Completed by the Mission logo, laser etched into the rear of the barrel, the Mission Nightfall is visually stunning!

Model 1
Available in four weights: 21g, 23g, 25g, 27g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NIGHTFALL

The Mission Nightfall features a straight barrel design and a tapered nose. The ringed front and central region progresses immediately into a very finely tapered rear, which incorporates an ultra fine ringed grip. During production the barrel undergoes both black and blue electroplating, providing a sharp contrast to the tungsten that's exposed by our precision re-machining process. The Mission logo, laser etched into the rear of the barrel, completes the stunning Mission Nightfall.

Model 2
Available in two weights: 22g, 24g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NIGHTFALL

The Mission Nightfall features a dual taper barrel design with a bull nose. The leading straight taper is ringed whereas the rear taper, which sees the barrel narrow in the final third, incorporates an ultra fine ringed grip. During its production the barrel undergoes both black and blue electroplating, providing a sharp contrast to the tungsten that's exposed by our precision re-machining process. Finally, to complete this spectacular dart, the Mission logo is laser etched into the rear of the barrel.

Model 3
Available in two weights: 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NIGHTFALL

The Mission Nightfall features a fully contoured barrel and a long radius nose. The ringed front and central portion of the barrel then progresses into an ultra fine ringed grip in the rear. During production the barrel undergoes both black and blue electroplating, providing a sharp contrast to the tungsten exposed by precision re-machining. Completed by the Mission logo, laser etched into the rear of the barrel, the Mission Nightfall is simply stunning!

Model 4
Available in three weights: 22, 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

AXIOM

The Mission Axiom incorporates a torpedo design with a long radius nose. Radial grooves are present along the entire length of the barrel. Full length parallel milled cuts are highlighted by a visually stunning ocean blue titanium nitride PVD coating. The Mission logo, laser etched, features at the rear of the barrel.

Model 1
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

STEEL TIP DARTS

90% TUNGSTEN RANGE

AXIOM

The Mission Axiom consists of a straight barrel with a bull nose. Radial grooves are present along the entire length of the barrel. Full length parallel milled cuts are highlighted by a visually stunning ocean blue titanium nitride PVD coating. The Mission logo, laser etched, features at the rear of the barrel.

Model 2
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

AXIOM

The Mission Axiom benefits from a fully contoured front section moving into a straight rear portion of the barrel. Radial grooves in the leading area of the barrel feature ocean blue titanium nitride PVD coating, as do the full length parallel milled cuts. Radial grooves continue throughout the central and rear sections of the dart before reaching the laser etched Mission logo.

Model 3
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

AXIOM

The Mission Axiom features a bomb design with radial grooved cuts and parallel milled cuts in the central portion of the barrel.

The stunning ocean blue titanium nitride PVD coating within the cuts contrasts spectacularly against the tungsten and the laser etched Mission logo.

Model 4
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NERO

The Mission Nero features a small bull nose moving into a fully tapered front section and straight rear, with radial grooving throughout. The barrel has a durable black titanium nitride PVD coating. The striking visual effect is further enhanced by the laser etched Mission logo and the re-machined parallel milled cuts that reduce in size towards the tapered head of the dart.

Model 1
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NERO

The Mission Nero consists of a straight barrel with a bull nose and radial grooves throughout. The barrel features a black titanium nitride PVD coating and undergoes re-machining to incorporate additional radial grooves and parallel milled cuts across its length. Finally the Mission logo is laser etched at the rear of the barrel.

Model 2
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NERO

The Mission Nero is a black titanium nitride PVD coated bomb design with a large radius nose. The central portion of the dart consists of detailed radial grooves, with re-machined parallel milled cuts and further radial grooving. The rear portion of the barrel features both the laser etched Mission logo and a large region of superfine microcuts.

Model 3
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

NERO

The Mission Nero benefits from a fully contoured front loaded nose leading into a straight rear portion of the barrel. The black titanium nitride PVD coated dart features various radial and shark grooves alongside striking re-machined parallel milled cuts. The Mission logo is laser etched into the rear of the barrel, resulting in a stunning overall design.

Model 4
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

STEEL TIP DARTS

90% TUNGSTEN RANGE

REBUS

The Mission Rebus benefits from a bull nose moving into a straight, radial grooved, front section. A gradual radius, featuring radial grooves and etched circular rings, narrows to a rear portion which consists of radial grooves, parallel milled cuts and the laser etched Mission logo.

Model 2
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

REBUS

The Mission Rebus features a straight barrel design incorporating a bull nose. Radial grooves are enhanced with alternating parallel milled cuts along the entire length of the barrel, followed by laser etching of the Mission logo.

Model 3
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

REBUS

The Mission Rebus consists of a bull nose moving into a straight front section of radial grooves and varied intricate parallel milled cuts. The large rear portion features scalloped fine radial grooves and is completed by the Mission logo, laser etched into the barrel.

Model 4
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

SPIRIT

The Mission Spirit features a torpedo design with a radius nose. There are two distinct regions of ultrafine radial grooving, including micro-shark, along the length of the barrel and the laser etched Mission logo is incorporated at the rear.

Model 1
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

SPIRIT

The Mission Spirit features a straight barrel with a small radius nose. The design consists of two distinct regions, each possessing its own style of radial grooving and is completed by the inclusion of the Mission logo laser etched into the rear of the barrel.

Model 3
Available Weights: 22, 24g, 26g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

SPIRIT

The Mission Spirit consists of a front loaded highly contoured barrel with a large radius nose. Shark micro-grooves feature in the thicker front portion of the barrel giving way to radial and shark grooves in the rear and finally the laser etched Mission logo.

Model 6
Available Weights: 21g, 23g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

DEEP IMPACT

The Mission Deep Impact features a straight barrel with a radius nose.

Ultrafine radial grooves are incorporated along the entire length of the barrel.

The striking and durable titanium nitride coating, applied by Physical Vapour Deposition (PVD), is complimented by four contrasting orange rings and the Mission logo, laser etched into the rear of the barrel.

Model 4
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

DEEP IMPACT

The Mission Deep Impact consists of a slightly front loaded highly contoured barrel. Radial grooves in the thicker front portion of the barrel give way to a microgrip scallop in the centre. The striking and durable titanium nitride coating, applied by Physical Vapour Deposition (PVD), is complimented by two pairs of contrasting red rings. The stunning design is completed by the Mission logo, laser etched into the rear of the barrel.

Model 5
Available Weights: 22g, 24g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

DEEP IMPACT

The Mission Deep Impact features a straight barrel with a small tapered nose. Both shark and fine radial grooves are incorporated along the length of the barrel. The striking and durable titanium nitride coating, applied by Physical Vapour Deposition (PVD), is complimented by four contrasting blue rings. Finally this stunning design is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 1
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

FORCE

The Mission Force features a straight barrel with radial nose. This design incorporates two distinct bands of radial v-grooves separated by three vibrant coloured rings, the hallmark of the Force collection. Finally the Mission Logo is laser etched into the rear of the barrel.

Model 11
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

FORCE

The Mission Force features a straight barrel with a radius nose. Precision ultrathin radial grooves feature across the length of the barrel, alongside three vibrant coloured rings and the laser etched Mission logo at the rear.

Model 25
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

FORCE

The Mission Force features a straight, slimline barrel with a tapered nose. There are two distinctive regions of knurling complimented by radial grooving and three vibrant coloured rings, alongside the Mission logo laser etched into the rear of the barrel.

Model 26
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

OCTANE

The Mission Octane incorporates a torpedo design where the long tapered nose, complete with radial grooves, transitions into a flat mid micro-grooved area. A tapered rear section is enhanced with three distinct bands of fine grooving, with the laser etched Mission logo completing the design.

Model 2
Available Weights: 21g, 23g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

OCTANE

The Mission Octane features a cut in radius nose leading into a front sector consisting of shark and radial grooves. The barrel then narrows to the rear, incorporating a fine radial groove and finally the laser etched Mission logo.

Model 3
Available Weights: 22g, 24g, 26g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

OCTANE

The Mission Octane features a straight barrel with a radius nose. Along the length of the barrel there is a variety of both ultrafine and standard radial grooving, with the Mission logo laser etched into the rear.

Model 5
Available Weights: 21g, 23g, 25g
Match Weighted to $\pm 0.05g$

BRASS DART RANGE

ARDENT

The Mission Ardent represents a whole new level in brass dart design and manufacture. The Mission Ardent has a bull nose and straight barrel, tapering to the rear and features a lustrous nickel coating with fine radial grooves and alternating re-machined grooves. The stunning design is complemented by the Mission logo, laser etched into the rear portion of the barrel.

Model 1
Available Weights: 23g

BRASS DART RANGE

ARDENT

The Mission Ardent represents a whole new level in brass dart design and manufacture. The Ardent features a radius nose which moves into a straight central region of the dart barrel, finally flowing into a long tapered section in the rear. The nickel plated barrel features alternating razorgrip and radial ring grip, using re-machining to deliver a simply stunning finish. Finally, the laser etched Mission logo completes this fantastic design.

Model 2
Available Weights: 24g

95% TUNGSTEN RANGE

KRONOS

The Mission Kronos Soft Tip consists of a slender torpedo design with a variety of radial grooves featuring throughout. The tapered rear portion of the dart incorporates Mission's new Iso-Grip technology and laser etched Mission logo. The parallel milled cuts and alternating isogons are highlighted by a visually stunning ocean blue titanium nitride PVD coating.

Model 2
Available Weights: 20g
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KRONOS

The Mission Kronos Soft Tip consists of a straight barrel featuring a variety of radial grooves throughout. The rear portion of the dart incorporates Mission's new Iso-Grip technology and laser etched Mission logo. The alternating milled cuts enhance grip and are completed by the visually stunning ocean blue titanium nitride PVD coating. This PVD coating is also applied to 3 radial grooves in the front section of the barrel and alternating isogons in the rear.

Model 3
Available Weights: 19g
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KURO

The Mission Kuro soft tip features a straight barrel design with radial grooves across the length of the dart. Re-machined grooves and milled cuts then provide a striking contrast against the black titanium nitride PVD coating, further enhanced by the laser etched Mission logo.

Model 1
Complete Weights: 21g, 23g (**Barrel Weights:** 19g, 21g)
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KURO

The Mission Kuro soft tip benefits from a fully contoured black titanium nitride PVD coated barrel. Microgrips and radial grooves are complimented by re-machined fine shark cuts and intricate parallel milled cuts. The Kuro is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 2
Complete Weights: 19g, 21g (Barrel Weights: 17.5g, 19.5g)
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KURO

The Mission Kuro soft tip is a black titanium nitride PVD coated dart that tapers from the centre of the barrel to both the front and rear. The dart features radial grooves and, in the rear portion of the barrel, Mission's Iso-Grip. The laser etched Mission logo, accompanied by re-machined radial grooves and milled cuts, ensure a striking visual impact from the Kuro.

Model 3
Complete Weights: 20g, 22g (Barrel Weights: 18g, 20g)
Match Weighted to $\pm 0.05g$

95% TUNGSTEN RANGE

KURO

The Mission Kuro soft tip incorporates a torpedo barrel design that tapers to the rear. The black titanium nitride PVD coated dart includes radial and fine shark cuts throughout with contrasting re-machined milled parallel cuts across the length of the barrel, alongside the laser etched Mission logo.

Model 4
Complete Weights: 19g, 21g (**Barrel Weights:** 17g, 19g)
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

REIKI

The Mission Reiki consists of a slight radius nose leading into a slender taper which progresses from the nose to the rear of the barrel. Across the length of the barrel a variety of radial grooves are accentuated by the stunning red electroplate finish, the signature of the Reiki dart. In contrast to the vibrant red, parallel re-machined milled cuts feature throughout. The dart is completed by the inclusion of the Mission logo, laser etched into the rear of the barrel.

Model 1
Available in three weights: 18g, 20g
Match Weighted to $\pm 0.05g$

90% TUNGSTEN RANGE

REIKI

The Mission Reiki consists of a straight barrel featuring a variety of radial grooves throughout. These precision grooves are accentuated by the stunning red electroplate finish, the signature of the Reiki dart. In contrast to the vibrant red, parallel re-machined milled cuts feature along the length of the barrel. The dart is completed by the inclusion of the laser etched Mission logo.

Model 3

DEEP IMPACT

The Mission Deep Impact features a straight barrel. Ultrafine radial grooves are incorporated along the entire length of the barrel.

The striking and durable titanium nitride coating, applied by Physical Vapour Deposition (PVD), is complimented by four contrasting red rings. The design is completed by the Mission logo, laser etched into the rear of the barrel.

Model 3
Available Weights: 18g, 20g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

FORCE

The Mission Force soft tip features a straight barrel. This design incorporates two distinct bands of radial v-grooves, accentuated by three vibrant coloured rings, the hallmark of the Force collection. Finally the Mission logo is laser etched into the rear of the barrel.

Model 2
Available Weights: 19g, 21g
Match Weighted to $\pm 0.05g$

80% TUNGSTEN RANGE

OCTANE

The Mission Octane soft tip features a straight barrel, along its length there is a variety of both ultrafine and standard radial grooving. The laser etched Mission logo complements the rear section of the barrel.

Model 1
Available Weights: 18g, 20g
Match Weighted to $\pm 0.05g$

BRASS DART RANGE

ARDENT

The Mission Ardent represents a whole new level in brass dart design and manufacture. The Ardent has a straight barrel, tapering to the rear and features a lustrous nickel coating with fine radial grooves and alternating re-machined grooves. The stunning design is complemented by the Mission logo, laser etched into the rear portion of the barrel.

Model 1
Available Weights: 18g

BRASS DART RANGE

ARDENT

The Mission Ardent represents a whole new level in brass dart design and manufacture. The Ardent features a straight central region of the dart barrel which flows into a long tapered section in the rear. The nickel plated barrel features alternating razorgrip and radial ring grip, using re-machining to deliver a simply stunning finish. Finally, the laser etched Mission logo completes this fantastic design.

Model 2
Available Weights: 18g

SAMURAI

The Mission Samurai is a top quality dartboard with ultra thin wire construction. The sharp angle of the wires enable the darts to glance over them and into the scoring areas, resulting in less bounce outs and damage to the darts.

Key Features:

- Competition Standard
- High Quality African Sisal
- Ultra Thin Wire Construction
- Staple Free
- Larger Scoring Areas
- Vibrant Non Fade Colours

AXIS

The Mission Axis is a high quality dartboard with triangular wire construction. The angled edges of the wires deflect the darts into the scoring areas, resulting in less bounce outs and damage to the darts.

Key Features:

- Competition Standard
- High Quality Brazilian Sisal
- Triangular Wire Construction
- Large Scoring Areas
- Vibrant Non Fade Colours
- White Number Ring

APOLLO

The Mission Apollo is an ideal entry level dartboard with a round wire construction. Made with Chinese Sisal the Apollo is a well built, robust and sturdy practice board ideal for beginners.

Key Features:

- Sturdy Construction
- Made With Chinese Sisal
- Round Wire Construction
- Staple Free Bullseye
- Bright Coloured Scoring Areas

CABINETS

Mission dartboard cabinets are available in a range of 3 fun and contemporary printed designs and also in classic black. The Mission Dartboard Cabinet is highly durable, featuring robust hinges and reinforced corners for extra strength and stability. Easy wipe score boards are integrated into the rear of each door and each cabinet is supplied with a markerboard pen and fixing kit.

HOME DARTS CENTRE

The Mission Home Dart Centre provides everything you need to enjoy darts at home. The cabinet is available in plain black or with a printed design on the front. Bespoke options are available for the Mission Home Darts Centre, please contact us for more details.

Plain Black

Double Top Printed Design

The centre consists of:

- Mission Wooden Dartboard Cabinet in either double top or classic plain black design, featuring reinforced corners, sturdy hinges and all fixings
- Mission Apollo Sisal Dartboard with staple free bullseye
- Two sets of brass darts, complete with shafts and flights
- Two drywipe scoreboards, integrated into the cabinet doors
- One drywipe marker

SURROUNDS - MISSION LOGO

The Mission dartboard surround, constructed from a high quality flexible polymer, is extremely durable and is specifically designed to conceal penetration marks from darts. The surround fits tightly around the dartboard, removing the need for any additional fixings. This surround featuring the Mission name and logo at either side, is available in red, blue and black. The high quality finish of the surround makes it perfect for additional personalisation.

SURROUNDS - PLAIN

The Mission dartboard surround, constructed from a high quality flexible polymer, is extremely durable and is specifically designed to conceal penetration marks from darts. The surround fits tightly around the dartboard, removing the need for any additional fixings. This surround is available in plain red, blue and black. The high quality finish of the surround makes it perfect for additional personalisation.

DART MATS - CARPET

The Mission carpet darts mat is constructed from hardwearing nylon that has been woven into a durable rubber non slip underlay. The carpet mat incorporates both official tournament specification oche measurements and the Mission logo. The mat's lightweight construction means that it is easy to roll out, transport and store away.

DART MATS - RUBBER

The Mission darts mat is a professional heavy duty rubber dart mat constructed from the highest quality synthetic rubber. Its thick gauge ensures that the mat is both hardwearing and stable when used in play. The heavy duty mat incorporates official tournament specification measurements and the Mission logo.

ROTAPRO PORTABLE DARTS TRAVEL STAND

The Mission RotaPro Portable travel stand is the perfect accompaniment for those who need their dartboard to be portable. The stand requires just a single screw for mounting to the back of the dartboard and can be built or dismantled in under a minute. The dartboard can then be easily rotated into position from the front while still providing an extremely stable mount for your dartboard.

100 MICRON UV FLIGHTS

Mission Flint and Flint-X spot UV flights are constructed from a sturdy 100 micron material, giving the flights durability and a highly consistent performance. The production process utilises the latest print technology to give these flights a striking visual finish alongside a micro textured surface, maintaining excellent grip to the shaft.

NYLON SHAFTS

Mission Grip Lock shafts are made of tough durable nylon and are available in a range of ten vibrant colours and three lengths.

Together with Mission S-Lock rings, these strong shafts provide a lock tight grip on your favourite flights.

ALIMIX SPIN SHAFTS

The Mission Alimix Spin dart shafts are precision made aluminium shafts with replaceable spinning tops. The robust Alimix shafts, in either black or silver, are available in medium, tweenie and short.

The Mission Alimix Spin tops, offered in six striking colours, have been engineered to spin freely on the Mission Alimix Spin dart shaft.

The spinning tops secure tightly to the shaft whilst being easy to change.

ALICROSS SHAFTS

Mission Alicross dart shafts are precision engineered to offer players all the benefits of a metal shaft, but with the characteristics of a nylon shaft. For each shaft length the Mission Alicross Dart Shaft matches the dimensions and weight of a dart fitted with a traditional nylon shaft, and there is no increase in length between the barrel and the flight. When using Mission Alicross there is no change in either aerodynamic profile or dart trajectory compared to the equivalent nylon shaft,

however the player receives all the benefits of a stronger metal shaft that doesn't need a ring to grip the flight. The Mission Alicross Dart Shaft opens up a whole new choice for players who usually choose nylon shafts. Available in medium, tweenie and short.

CARBON FIBRE SHAFTS

Mission Carbon dart shafts are manufactured from a carbon composite material which offers exceptional strength. The slimline shaft, featuring a design inspired by traditional metal shafts, grips flights firmly without the need for a ring. Mission Carbon dart shafts are available in medium, tweenie and short.

R-POINT EXPERT REPOINTING TOOL

The Mission R-Point Expert is the perfect tool for repointing any steel tip dart. The robust construction ensures excellent grip at the point clamp and the heavy duty sliding bar provides great leverage, resulting in a strong and consistent turning force when removing the original point and inserting the new one. The tool is supplied with three Allen keys and a durable faux leather case with pockets for the repointer, tools and replacement points.

DART & ACCESSORY PACKS

90 PIECE DART & ACCESSORY SET

The Mission 90 Piece Dart & Accessory Set includes two sets of darts and the widest range of essential dart accessories. This comprehensive set contains two sets of coated 24g steel tip brass barrels featuring a ringed grip throughout (the soft tip set contains two sets of coated 18g soft tip brass barrels), six sets of nylon shafts, six sets of Mission 100 micron flights in a range of colours, sixteen flight protectors and thirtytwo shaft springs. The Mission 90 piece Dart & Accessory Set is a superb gift set for beginners, providing new players with everything needed to go out there and play darts!

FIVE FLIGHT SELECTION PACK

The Mission Flight Selection Pack contains five sets of Mission flights in white, red, green, blue and black. The flights are constructed from a sturdy 100 micron material, ensuring durability and a highly consistent performance. The Mission flight production process provides the flights with a striking visual finish.

POINTS

PROBE DART POINTS

Mission Probe V1 and V2 dart points are machined points which feature precision grooves. Available in black or chrome finish and in both 32mm and 36mm length, Probe points provide players with additional grip along the length of the point. Precision grooving doesn't just look fantastic, it also increases the surface area of the point which increases friction with the sisal of the dartboard and significantly reduces bounce outs.

GLIDE DART POINTS

Mission Glide dart points offer players an unrivalled choice, with the widest range of point lengths within the industry. Mission Points are manufactured to the highest standards of precision and finish, all our black, chrome, gold and rainbow points are available in 30mm, 32mm, 34mm, 36mm, 38mm and 40mm length.

PROBE V1

PROBE V2

TITAN PRO CONVERSION POINTS

The Mission Titan Pro Titanium conversion point transforms your soft tip darts, so you're ready to play the steel tip game. The Titan Pro is crafted from titanium which ensures extreme strength, low density and tremendous resistance to corrosion. The contouring, intricate machining and precision grooving on Mission Titan Pro points provides additional grip for players, and looks simply stunning. Available in silver or black, 26mm, 30mm and 34mm lengths and supplied with silicon O-rings attached.

TITAN PRO SOFT TIP POINTS

The Mission Titan Pro Soft Tip Point is a high quality, tough and durable soft tip available in a range of vibrant colours. The Mission production process utilises the highest quality polymers which ensures strength and consistency. The use of premium pigments during the polymerisation process provides each Mission Titan Pro Soft Tip Point with its intense colour.

Each pack contains 50 Points.

F-PROTECT FLIGHT PROTECTORS

The Mission F-Protect flight protector is both lightweight and durable, protecting your flights from damage and stabilising the flight when the dart is thrown. The anodised aluminium flight protector is available in 10 striking colours.

O-RING APPLICATOR

The Mission O Ring Applicator is a handy tool which allows players to quickly and accurately place o-rings onto shafts and conversion points. The tool is specifically designed to ensure O-rings are precisely located onto your accessories and also retains the o-rings securely on the tool until they are needed. The Mission O-Ring Applicator is supplied with twelve O-rings already loaded onto the tool.

SHARPENERS

DUPLEX SHARPENING STONE

The Mission Duplex sharpening stone is a pocket sized double sided sharpening stone that provides both coarse and fine sharpening of your dart points. The Mission Duplex sharpening stone gives players maximum control when sharpening points, resulting in fewer bounce outs and more consistent scoring.

ROUGH

SMOOTH

V-SHARP SHARPENING STONE

The Mission V-Sharp sharpening stone is a pocket sized dart point sharpener to help you keep your points in perfect condition. The V-groove locates the tip of the point for even and consistent sharpening every time.

KEYRING SHARPENER

The Mission keyring dart sharpener ensures you can always keep your points in perfect condition, no matter where you are. The handy sharpener contains a durable round sharpening stone, wrapped in sturdy faux leather and attached to a strong stainless steel ring.

GRIP WAX

Mission Grip Wax is a colourful high quality finger grip wax with a distinctive scent. Mission Grip Wax significantly enhances grip when applied to the fingers before play, and can then be used throughout the match to maintain grip. Available in strawberry, grape, apple or blueberry scent.

Size: 45mm x 32mm x 7mm.

BROKEN SHAFT REMOVER

The Mission Aluminium Broken Shaft Remover can remove broken shafts and broken soft tip threads with ease. This durable tool has teeth which lock securely onto the broken shaft or soft tip, allowing you to simply unscrew the thread. Available in red, blue, silver and black.

ALIFIX PRO SOFT TIP REMOVAL TOOL

The Mission AliFix Pro soft tip board extractor tool is precision engineered, ensuring that any broken soft tip points can be easily removed from your soft tip dartboard. The design of the Mission AliFix Pro allows the broken tip to be pushed safely through the board without damaging to the scoring segment. Available in red, blue, silver and black.

F-LOCK PRO

The F-Lock Pro is a superior flight punch that can be used as part of our F-Lock flight and ring system, as well as being compatible with all standard rings and springs. It is used to punch a hole through the flight so that a ring can be inserted into the resulting hole and then placed over the shaft - creating a strong grip that keeps the flight firmly in place. The punch has been ergonomically designed for a comfortable grip and is available in six colours.

Available in these six colours:

RINGS

Mission F-Lock rings are used with flights that have been prepared with our F-Lock Pro flight punch. Available in five colours, these strong anodized aluminium rings keep the flight tightly locked in place.

Mission S-Lock rings are the premium machined aluminium rings used on Mission GripLock shafts. The Mission S-Lock ring, available in black and silver, ensures that your flights are held securely.

S-LOCK RINGS

F-LOCK RINGS

F-LOCK TITANIUM

The Mission F-Lock Titanium ring is used with flights prepared by the Mission F-Lock punch. Constructed from titanium, the ultimate engineering metal, the ring is far lighter and stronger than standard rings.

S-LOCK TITANIUM

The Mission S-Lock Titanium ring is used with Mission Grip Lock shafts. Constructed from titanium, the ring is both lighter and stronger than standard aluminium rings and gives exceptional durability and performance.

LUXOR

The Mission Luxor is a stylish and highly robust extra large darts case made from a durable EVA material. The Luxor contains two adjustable EVA inserts which allows you to securely store and transport four sets of assembled darts, whatever the length of your setup! Two removable Perspex tubes are included, ideal to store points and other small accessories. The case also features sixteen flight storage pockets, fifteen individual shaft storage pockets and an additional large zipped compartment.

Dimensions: 185mm x 225mm x 85mm

Available in five colours:

- Charcoal
- Green
- Black
- Blue
- Red

FREEDOM XL

The Mission Freedom XL is a stylish darts case made from a durable EVA material. It is large enough to fit a full set of three assembled darts, with extra sets of flights, stems and a range of accessories. An adjustable EVA insert allows any length of fully assembled dart to be held safely and securely. The XL is available in six vibrant colours and looks fantastic with the Mission logo embossed into the rear.

Dimensions: 120mm x 200mm x 40mm

Available in five colours:

Charcoal
Green
Black
Blue
Red

FREEDOM SLIM

The Mission Freedom Slim is a stylish slimline darts case made from a durable EVA material.

The case carries a full set of three assembled darts, alongside flights, stems and other accessories. An adjustable EVA insert allows any length of fully assembled dart to be held safely and securely. The Slim is available in six vibrant colours and looks fantastic with the Mission logo embossed into the rear.

Dimensions: 88mm x 215mm x 48mm

Available in five colours:

- Charcoal
- Green
- Black
- Blue
- Red

SPORT 8 DART WALLET

The Mission Sport 8 darts case is a stunning bar wallet available in a range of eight striking colours.

The black wallet, complemented by contrasting stitching and coloured Mission logo, can store a full set of darts and flights.

FLINT WALLET

The Mission Flint Wrap Wallet is the perfect darts storage system when you're on the move. The textured faux leather construction is hardwearing and looks great, accentuated by the Flint design and Mission logo in contrasting colours. The wrap wallet holds a set of fully assembled darts and is designed to carry all your essential accessories too with five flight pockets, six shaft pockets and card holder incorporated into its design. Finally a stainless steel eyelet, rear zipped pocket and secure magnetic closure guarantee your darts and accessories remain protected.

POD DART HOLDER

The Mission Pod is an innovative rigid EVA darts holder. Simply insert a set of darts into the top of the holder and the angled foam interior ensures that each dart is securely gripped. The hardwearing exterior is exceptionally strong, offering fantastic protection for your darts when you're on the move. The Pod is practical, as well as portable, featuring an elasticated pocket to the rear for all your essential accessories and a stainless steel eyelet. The holder is finished with contrasting white stitching and the Mission logo.

METAL OCHES

The Mission Pro Steel Oche is a highly robust and durable retractable steel ochre, available in yellow or white. The ochre secures firmly to the floor via pegs that locate snugly into the fittings provided, meaning the ochre can be placed or removed in seconds.

Floor fittings (supplied)

The Mission Steel Oche is a retractable metal ochre which secures firmly to the floor via pegs that locate snugly into the fittings provided, meaning the ochre can be placed or removed in seconds.

THROWLINES

Mission throwline oches employ vibrant and contemporary designs to clearly mark the position of the throwline, with the distances clearly shown in metric and imperial units. The top sides are finished with a durable matt laminate to minimise wear and tear whilst reducing glare, and the undersides have a strong 3M adhesive backing so that they can be fixed securely in place.

ACRYLIC SCORE BOARDS

The Mission White Acrylic Markerboard utilises an innovative reverse printed construction which provides unrivalled durability and ease of cleaning. The strong acrylic writing surface is highly resistant to staining, even after prolonged use. Both Mission Scoreboards are supplied with screws and 3M adhesive fixing kits.

Durable easy wipe writing surface

Printed on the back of 3mm acrylic

501 Scoreboard

Cricket Scoreboard

ACRILIC SCORE BOARDS

The Mission Black Acrylic Markerboard utilises an innovative reverse printed construction which provides unrivalled durability and ease of cleaning. The Perspex writing surface is highly resistant to staining, even after prolonged use, and the board is supplied with both screw and 3M adhesive fixing kits. In our opinion this is the best black markerboard on the market! The Mission Black Acrylic Markerboard is not suitable for use with blackboard chalk.

Durable easy wipe writing surface

Printed on the back of 3mm acrylic

501 Scoreboard

Cricket Scoreboard

REVERSIBLE CHALK SCORE BOARDS

The Mission Reversible Chalk Markerboard has been cleverly designed to incorporate scoring for 501 on one side and cricket on the other. The microtextured surface ensures the chalk marks clearly on the markerboard, yet is cleaned away with a wipe. The board is supplied pre drilled, so it can be easily hung, turned and replaced in seconds. The hardwearing markerboard features high quality printing and a sturdy construction.

501 Chalk Scoreboard

Cricket Chalk Scoreboard

DRY WIPE PENS

DRY WIPE MARKER PENS - COLOUR

Each Mission colours marker pens pack contains four high quality coloured markerboard pens. Each marker pen features a sturdy bullet shaped nib and utilises easy wipe ink that cleans quickly and easily from the markerboard.

DRY WIPE MARKER PENS - BLACK

Each Mission marker pens pack contains four black markerboard pens. The pens feature a sturdy bullet shaped nib and utilise easy wipe ink that cleans quickly and easily from the markerboard.

MISSION WHITEBOARD KIT

The Mission Whiteboard Kit is a handy combination for use with any markerboard. Two black markerboard pens, each featuring a bullet nib and easy wipe ink, fit snugly into the Mission eraser. The Mission Whiteboard Kit keeps all your markerboard essentials close to hand.

LIQUID CHALK MARKER PENS

LIQUID CHALK MARKER PENS - COLOUR

The Mission Liquid Chalk Markers are fantastic for use on all types of markerboard.

These pens provide a colourful alternative to chalk and traditional dry wipe markers.

The liquid chalk markers are non toxic, water based, odourless and provide vibrant colours that can be simply wiped away. Each pack contains 8 differently coloured markers and every marker is fitted with a reversible nib that can be set to either bullet or chisel. The pens can be used to write on all non porous surfaces.

LIQUID CHALK MARKER PENS - WHITE

The Mission White Liquid Chalk Markers are fantastic for use on all types of markerboard. These pens provide a great alternative to chalk and traditional dry wipe markers. The liquid chalk markers are non toxic, water based, odourless and can be simply wiped away. Each pack contains four white markers and every marker is fitted with a reversible nib that can be set to either bullet or chisel. The pens can be used to write on all non porous surfaces.

QUARK DIGITAL WEIGHING SCALE

The Mission Quark is a high precision digital pocket weighing scale capable of recording masses of up to 300 grams, with an accuracy of one hundredth of a gram (0.01g). The Mission Quark is the ideal scale for providing highly accurate weight measurements of both steel tip and soft tip darts. The display is backlit in cool blue which ensures that weights are clearly visible, even in low light conditions.

RESTORE - WIRE BRUSH

The Mission Restore brush cleaning kit is a darts care system designed to maintain and renew the performance of tungsten darts. The three cleaning brushes provide a quick and simple multistage cleaning process, depending upon the condition of your dart barrels and points. Each brush has been carefully constructed so as not to damage tungsten's metallic finish. The heaviest oxidation is easily removed by the stainless steel bristle brush, lighter tarnishing is quickly eliminated by the softer brass bristle brush and then final cleaning is achieved with the nylon bristle brush.

FLUX HAND WARMERS

The Mission Flux Hand Warmer offers instant heat during the coldest of conditions. Simply click the metallic disc and the crystallisation of the gel steadily releases heat to the hands, maintaining grip and sensation in the fingers. To regenerate, simply heat the hand warmer in water until the crystals dissolve, and it is ready for use once again. The fun, flight shaped hand warmers are available in red, blue, green, purple and clear.

ACRYLIC STANDS

MISSION CUBE STAND

The Mission Cube is a simple, yet stunning, transparent acrylic dart display stand which holds one set of assembled darts. The clear acrylic, Mission logo and contrasting frosted point locators look fantastic. The Mission Cube is the perfect way to showcase that extra special set of darts.

MISSION STATION 9

The Mission Station 9 is the ultimate acrylic dart storage system. Up to three sets of assembled darts can be stored and displayed, alongside individual compartments for five sets of stems and eight flight slots, each slot capable of holding two sets of flights! There is additional space to store rings, springs, points, flight protectors and all your dart essentials.

ACRYLIC STANDS

MISSION STATION 12

The Mission Station 12 is a stunning acrylic darts display arc which allows a player to store and display up to four sets of darts.

The acrylic construction is sturdy, looks simply fantastic and is easy to clean.

KEYRINGS

The Mission keyring is a high quality silicone keyring available in five striking colour variations. Each keyring, which boldly displays the Mission name and logo, is constructed from tough, flexible black silicone combined with a sturdy stainless steel chain.

BADGES & PATCHES

IRON ON PATCH

The Mission Iron on Patch is a 102mm x 68mm woven badge featuring the Mission name and logo in white, contrasting against the rich black background. The patch can either be ironed or sewn onto your garment.

PIN BADGE

The Mission Pin Badge is an enamel badge featuring the Mission logo in brilliant chrome set against a gloss black enamel background. The pin is securely fastened to clothing by the sturdy clasp included. Diameter 25mm

DART SHIRTS

The Exos Cool FX is a high performance dart shirt featuring an all black design with coloured front section available in a range of stunning colours and sizes from small to 5XL. The shirt is lightweight, comfortable, highly breathable and able to be washed and worn repeatedly with no ironing and no significant colour loss. The shirt's technical weave and synthetic thread uses the scientific principle of capillary action to draw moisture away from the body, reducing temperature and maximising comfort.

DART SHIRTS

The Exos Cool SL is a high performance dart shirt featuring an all black design with a coloured sleeve section available in a range of stunning colours and in sizes from small to 5XL. The shirt is lightweight, comfortable, highly breathable and able to be washed and worn repeatedly with no ironing and no significant colour loss. The shirt's technical weave and synthetic thread uses the scientific principle of capillary action to draw moisture away from the body, reducing temperature and maximising comfort.
